Assignment 2-2

- SQL queries for course registration DB
- TODO
 1. Show the buildings with more than 20 rooms.
 2. Insert your student data in 'Student' table.
 3. Change the building with the name 'IT/BT' to '정보통신관'
 4. Show the building number (id) and the building name that have a classroom with the capacity more than 100.
 5. In Class table, divide course_id column into department and course_number (e.g. ITE3070 → ITE, 3070), and show top 10 department with the largest number of open courses.
